

Money Making Concepts

11th
Entries / MMXM

Entries are the easiest part

Hard work is done on the HTF

Context Areas

The area where we take a trade.

- Always trading Usual Context

Entries are all about FVGs

1

Sharp Turn

FVG in, FVG out

2

Order Flow Legs

LTF Order Flow

What type of Time do we have?

1

HTF Time

Refers to the economic calendar, news events.

2

LTF Time

Refers to sessions / killzones.

Forex: 2am - 10am

Indices: 930am - 4pm

LTF Time

The lower you go in Timeframes the more relevant a session / killzone is. 15m and below.

- 1) Forex
- 2) Indices
- 3) Volatility Calculator

Timeframe Alignment

The closer the Context timeframe and Entry timeframe are to each other, the less confirmation you need.

Sharp Turn

Order Flow

Monthly - Daily

Monthly - 4h

Weekly - 4h

Weekly - 1h

Daily - 1h

Daily - 15m

4h - 15m

4h - 5m

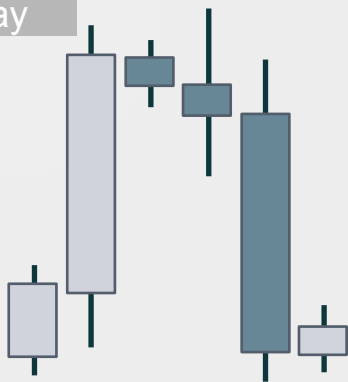

1h - 5m

1h - 1m

15m - 1m

15m - 1m

PD Array

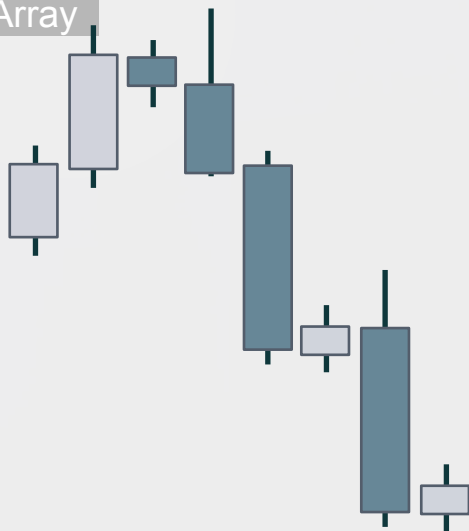

Sharp Turn

FVG in -> FVG out.

Manipulation, trapping traders.

FVGs don't have to be overlapping.

PD Array

Order Flow

Order Flow Legs

Market Structure -> Order Flow

1

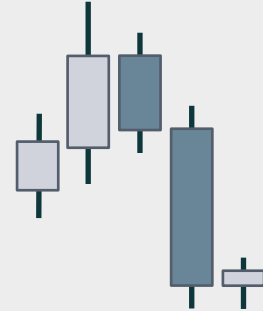

Timeframes

STH = ITH
STL = ITL

So we don't get lost
in the Lower Timeframes
later on

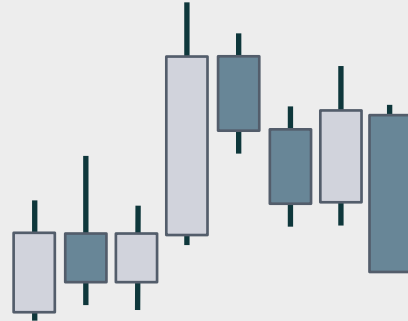

STH

Daily Timeframe

ITH

4h Timeframe

Choose your baseline

Extra confirmation is above your baseline

Risk Management

Trade Management

SL above Order Flow leg

2RR within context area

Break Even when there's no reason to return based on Order Flow

Trade Frequency

1 trade a day

Risk Allocation

Boundaries

Case Study

Choose your entry and stick to it. Start studying your entry at context areas.
